#4

SUMMARY OF CHANGES

RTOG 94-13 Prostate July 1, 1997

The following changes are in effect:

Pathological lymph-node-positive patients (eligible for RTOG 96-08) are excluded from RTOG 94-13. This change affects the Schema, Eligibility Checklist (Q4), Sections 3.1.2, 3.2.9 (new) and 6.4.1 (line 3).

The option of using Lupron was also added to the Schema and to the Consent form. This is a correction, not a change. See *Summary of Changes* #2, 3/1/96.

Section 3.1.6.1 Corrected *atrophy* to *hypertrophy*.

Section 3.1.6.2 Added *"testosterone effect . . . by 90 days"* as clarification (NCI recommendation).

Section 6.4.1 Highlighted line 4 for emphasis.

Section 6.4.2 Sentences 2-3 are new.

Section 6.6.2 Added

Rectal blocks should be used on lateral fields.

Section 7.1.2.2 (new) In place of four single doses, a 3-month depot of Zoladex or Lupron plus one single dose depot is allowed.

Section 10.0 Pathology materials will be sent to the RTOG Tissue Bank at LDS Hospital *(also affects Section 12.0, the P6 and P7 requests were dropped).*

Section 11.1 Item "f" was expanded to include all PSA's.

#3

SUMMARY OF CHANGES

RTOG 94-13 Prostate October 1, 1996

The following corrections are in effect:

Section 3.1.6 Prior finasteride (≥ 60 days) and testosterone (≥ 90 days) are allowed (also affects Section 3.2.4).

Section 3.1.9 Treatment may begin up to 6 weeks after randomization. The prior 3 week limit excluded our Canadian members.

Section 3.2.5 Prior cancer (≥ 5 years ago) does not exclude the patient from this study.

Section 6.4.1 Urethrogram will be used as part of the simulation of both prostate only and whole pelvis fields.

Section 13.4 Was added to address the *Inclusion of Women and Minorities*.

The changes to Section 3.0 also affect the Schema and the Eligibility Checklist

Replacement pages are attached.
